

Project Progress Report -1

Name: Jyothi Kadapala

Student ID: 02035892

Git User ID: Jyothi-555

Project: CarKonnnect

What Am I Proud about:

I was able to write HTML and CSS code for Car listings and insert images with respect to that listing and was able add price range feature to that app which we were thinking to add to our project where we can choose a price range for a car that customer is looking for. I have added a login form to the webpage with username and password in it.

I am also proud that I am trying to know more about firebase and how I can learn more about them and add it to our webpage.

Database and Backend (In-Progress):

I am learning more about the firebase and also looking for suitable database which can be used for the project.

Next Steps:

- Finalize API for the project.
- Work more on Backend framework.
